

# Enviro Flow

4" High Efficiency Rigid Cell Filter

Enviro Flow 4" Filters are designed to handle high airflow and provide low pressure drop. Enviro Flow 4" filters utilize a durable frame and media that stand up to turbulence and abrasion that typical medias cannot withstand. Enviro Flow 4" filters make great replacements for 4" mini pleats, other 4" deep high efficiency filters, 12" deep rigid cells, and 4 and 6 panel V-cells by reducing energy costs, while providing high dust holding and long filter life.

- Available in MERV 11, 13, & 14 rated per ASHRAE test standard 52.2
- Available in 4" and 12" with and without header.
- Available in plastic or galvanized frame in most sizes.
- Ideal for hospitals, schools, government buildings, office complexes, public arenas, general industrial.
- Durable frame and media resists tearing or damage, resists moisture, and does not support microbial growth.

**Bigger is not always better...**

73% Lower Pressure Drop

Improved Dust Holding Capacity

Lower cost than 12" Rigid Cell

Up to 67% Reduction in Shipping Costs

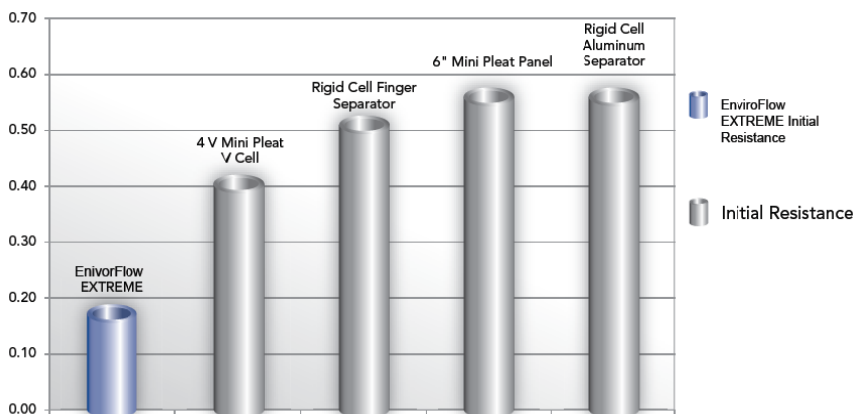

Extended Filter Life

2/3 Smaller for Easier Handling

Sustainable component for a  
LEED/Green Building Initiative

Enviro Flow Extreme Initial Resistance Comparison

\* Airflow for MERV 13 efficiency at 492 FPM.
